SUMMER CATALOGUE

MARLIN AUSTRALIA, YOUR TRUSTED PARTNER IN MARINE SAFETY AND APPAREL.

As a family-owned business with humble beginnings in the 1970s, we take great pride in our Australian roots and the remarkable journey that has led us to become a leader in safety, both locally and internationally.

With a strong presence in the Australian, New Zealand, American, Canadian, and European markets, Marlin is at the forefront of safety, constantly striving to deliver exceptional products that protect and save lives. Our commitment to excellence is evident in the trademarks and licenses we hold for the manufacture of Personal Flotation Devices (PFDs) worldwide. We adhere to rigorous safety standards, ensuring that our products meet and exceed the expectations of each region.

At Marlin, we understand the importance of safety across various water sports and marine industries. That's why we offer a comprehensive range of products designed for both recreational and professional use. From lifejackets to accessories and wet-weather clothing, our high-quality gear is trusted by water enthusiasts and professionals alike.

Whether you're a passionate sailor, an adventurous kayaker, or a commercial marine operator, Marlin has you covered. Our dedication to innovation and customer satisfaction means you can count on us to provide reliable, durable, and comfortable gear that enhances your safety on the water.

Join us as we continue to write our success story, building on our legacy of excellence in marine safety and apparel. Explore our products and discover the world of Marlin Australia - where quality, reliability, and safety come together to create unforgettable water experiences.

For over 50 years, Marlin has been a trusted name in the marine safety and marine apparel industry.

MARLIN'S BUOYANCY LEVEL GUIDE

LEVEL 50S

WATER CONDITIONS

Smooth Waters Only
Includes rivers, lakes, creeks and streams. Enclosed waters within half a nautical mile from land.

SUITABLE FOR

Near shore use, within sight of land, and means of rescue are close at hand. Limited protection against drowning.

ACTIVITIES

Fishing, boating, sailing, paddle boarding, kayaking, canoeing, wind surfing, water skiing, wakeboarding, tubing and people being towed.

Can be worn when riding a jetski/ PWC within half a nautical mile from land.

FUNCTION

Entire lifejacket can be of any colour. Designed to return wearer to the surface, to provide buoyancy in the water and requires active participation by the wearer. Does not assist in turning the wearer face-up.

LEVEL 50

WATER CONDITIONS

Partially Smooth Waters
Mainly enclosed and partially smooth waters. Includes open water within 2 nautical miles from land.

SUITABLE FOR

Near shore use, within sight of land, and means of rescue are close at hand. Limited protection against drowning.

ACTIVITIES

Fishing, boating, sailing, paddle boarding, kayaking, canoeing, wind surfing, water skiing, wakeboarding, tubing and people being towed.

Can be worn when riding a jetski/ PWC within 2 nautical miles from land.

FUNCTION

Upper portion (above the waterline) must be a conspicuous colour (red, orange or yellow) for high visibility. Designed to return wearer to the surface, to provide buoyancy in the water and requires active participation by the wearer. Does not assist in turning the wearer face-up.

LEVEL 100

WATER CONDITIONS

Open Waters
Ideal for coastal and open water use, but within sight of land.

SUITABLE FOR

Near shore use, and means of rescue are available. May have to wait for rescue. Limited protection against drowning. Not intended for rough waters. Minimum requirement for general coastal use.

ACTIVITIES

Fishing, boating, paddle boarding, kayaking and canoeing in coastal, open waters. Not to be used for high-impact activities i.e. wakeboarding, water skiing, tubing or riding a jetski/ PWC.

FUNCTION

Features collar head support (inflated bladder or a foam collar). The collar assists in rolling the wearer over to a supine, face-up floating position to keep airways clear, but requires active participation by the wearer.

Foam Lifejacket (inherently buoyant):

- Upper portion (above the waterline) must be conspicuous red, orange or yellow for high visibility
- Reflective tape on exterior
- Wearers above 15kg have safety whistle attached
- Bulkier style jacket but does not require servicing

Inflatable Lifejacket (requires activation):

- Exterior can be of any colour
- Interior bladder is a conspicuous yellow colour for high visibility (visible only when activated)
- Reflective tape on internal bladder
- Safety whistle attached
- Less bulky jacket but requires servicing and rearming
- Two types available: manual inflation or automatic inflation (when in contact with water)

LEVEL 150

WATER CONDITIONS

Open Waters / Rough Conditions
Offshore waters.

SUITABLE FOR

Offshore use worn over wet weather clothing. High performance in rough waters.

ACTIVITIES

Fishing, boating, paddle boarding, kayaking and canoeing in coastal, open waters. Not to be used for high-impact activities i.e. wakeboarding, water skiing, tubing or riding a jetski/ PWC.

FUNCTION

Features collar head support (inflated bladder or a foam collar). The collar assists in rolling the wearer over to a supine, face-up floating position to keep airways clear, but requires active participation by the wearer.

Foam Lifejacket (inherently buoyant):

- Upper portion (above the waterline) must be conspicuous red, orange or yellow for high visibility
- Reflective tape on exterior
- Wearers above 15kg have safety whistle attached
- Bulkier style jacket but does not require servicing

Inflatable Lifejacket (requires activation):

- Exterior can be of any colour
- Interior bladder is a conspicuous yellow colour for high visibility (visible only when activated)
- Reflective tape on internal bladder
- Safety whistle attached
- Less bulky jacket but requires servicing and rearming
- Two types available: manual inflation or automatic inflation (when in contact with water)
