Leave Nothing to Waste

We take responsibility for our product's end-of-life. Compost Connect is a brand agnostic platform committed to education, lifting composting rates, and connecting foodservice businesses to commercial composters.

Businesses can find certified compostable packaging suppliers

Education Support

Educational content for businesses and end users

GO CIRCULAR

The traditional economic model follows a linear path: take, make, waste. BioPak is committed to disrupting this outdated model and investing in a waste-free future — where innovative design and corporate responsibility intersect to create a circular, regenerative economy.

Plant-Based Raw Materials

We use rapidly renewable, plant-based materials designed to have a low impact on the environment at each stage of their life cycle. A great alternative to traditional plastics made from finite fossil fuels. Our certified compostable products are designed to break down in either a home compost or industrial composting facility, turning waste into nutrient-rich fertiliser. A simple way for businesses to make better choices, without compromising on quality or performance.

Plant Fibre

FSC™ Paper and Wood

PLA Bioplastic

Learn more about our materials at www.biopak.com/responsible-materials

The End is Just the Beginning

When disposed of correctly, our products are designed to be turned into nutrient-rich compost, along with any food waste. Compost can help mitigate climate change by improving the soil's ability to stabilise carbon and increase plant growth, which then pulls more carbon dioxide out of the atmosphere.

Discover the benefits of composting at www.biopak.com/resources/benefits-of-composting.

Responsible Supply Chain

BioPak products hold several certifications to ensure our products are made with people and the planet in mind. Our certifications hold our manufacturers accountable and set a standard in the packaging industry, making sure people are treated and paid fairly, our products are safe for consumers, and the planet is protected.

Fast Delivery

We know how important it is to have stock ready when you need it. That's why we offer next day delivery for metro orders placed before 1:30 pm local time. From our warehouse locations across Australia, we offer free freight to most metro areas (for orders over 4 cartons) and subsidised freight to remote locations. [Learn more at biopak.com/au/support/delivery-returns](http://biopak.com/au/support/delivery-returns).

Compostable Solutions

Did you know food waste in landfill is the third largest contributor to climate change, releasing harmful methane gas?

Compostable packaging acts as a vehicle to curb food waste – both food waste and compostable packaging can go in the same bin to be turned into nutrient-rich compost. The Compost Connect platform helps to connect businesses to compost pick up services, diverting waste from landfill and avoiding harmful greenhouse emissions. Compost Connect currently has 23 compost partners servicing 2,200+ suburbs across Australia and New Zealand.

Find your local composter at Compost Connect today at compostconnect.org

Net-Zero Commitment

BioPak is proud to align with the Science Based Targets initiative (SBTi)-approved target of achieving net-zero emissions by 2050. We are committed to reducing our emissions by 50% by 2030 and 90% by 2050. This target reflects our commitment to ambitious emissions reductions in line with the latest climate science. Despite global challenges, our net-zero goal will drive meaningful change by setting standards that ripple through the entire supply chain and industry. [Learn more about our Emissions Reduction Plan at www.biopak.com/sustainability-report-jan-dec-24](http://www.biopak.com/sustainability-report-jan-dec-24)

SINGLE USE PLASTIC BANS AUSTRALIA

WHAT PRODUCTS CAN YOU USE?

BioPak supports single-use plastic bans and offers approved alternatives for all banned items. Alternatives include FSC™ wood and paper products, plant-based packaging and home compostable Aqueous lined products.

The following information reflects all bans regulated as of the 20 August 2025. More detail available at biopak.com/au/au-plastic-bans.

*Exemptions in each state allow the supply and use of some banned single-use plastic items for specific circumstances. Please refer to each state's website.

Please ensure compliance with the bans by using only certified compostable items (Home Standard AS5810 or Industrial Standard AS4736) in WA and SA, where some compostables are accepted as alternative to banned plastic items.

BioPak has the solutions to help you transition smoothly and effortlessly ahead of these bans. Please note that the detail here is BioPak's interpretation (not legal advice) of the regulation passed and proposed.

GIVE BACK FUND

\$5,298,081

As a profit for purpose business, we are driven to preserve and protect the environment and give back to the communities we live in. We started the BioPak Give Back Fund in 2012 and have since dedicated our time, energy and a total of \$5,298,081.

126,081,229 Tonnes of Plastic Avoided

At BioPak, we champion the transition to a circular economy with plant-based, industry-leading products. The majority of our product range is made from renewable materials and certified compostable. Since 2010, we've worked with our customers to avoid 126,081,229 tonnes of plastic.

204,390 Trees Planted

We're passionate about protecting and restoring rainforests, donating 1% of profits to support Rainforest Rescue in Australia and Green Fleet in New Zealand. Since 2010, we've planted 204,390 trees and purchased eight hectares of endangered rainforest.

OzHarvest Partnership

OzHarvest is Australia's leading food rescue organisation, saving quality surplus food from businesses and delivering it to over 1,300 charities nationwide, supporting those in need.

Through our partnership with OzHarvest, KiwiHarvest and Worcester Food Bank, we've donated at least 560,465 meals to those who need it.

Saving Lives With MedEarth

Millions of people worldwide lack access to basic healthcare, while perfectly usable medical supplies are discarded in landfills across Australia. That's why we're proud to partner with MedEarth to help bridge the resource gap by redistributing medical equipment to where it's most needed. With our support, MedEarth has delivered life-saving aid to developing countries and positively impacted 350,000 lives. This collaboration reflects our shared dedication to protecting the environment and making a meaningful difference to those in need.

PAPER CUPS, LIDS & ACCESSORIES

Hot Paper Cups & Lids

Hot cups made with paper from managed plantations, lined with a home compostable water-based aqueous or PHA lining, or an industrially compostable plant-based bioplastic lining.

BioCup Accessories

Find home compostable lids, recycled paper cup trays, FSC™ cup sleeves and compostable stirrers and teaspoons in our ranges.

Huskee Reusable Cups

HuskeeCups include the Original, Renew, and Steel ranges—each designed for sustainability. Made from coffee husk, recycled plastic, or from 91% post-consumer recycled stainless steel, they look great, reduce waste, are reusable, durable, and elevate coffee rituals.

No Added PFAS

Hot + Cold Friendly

CPLA:
Industrially Compostable AS4736

Paper:
Industrially Compostable AS4736

BioCane:
Home Compostable AS5810

Bioplastic

Made with a bioplastic made from rapidly renewable plant-based resources – not fossil fuels. The below PLA lids are certified industrially compostable (AS4736). They are not recyclable with non-compostable plastics.

BioCane

Made from reclaimed and rapidly renewable sugarcane pulp, these lids are certified home and industrially compostable (AS5810 and AS4736) and will contribute to nutrient-rich compost with no toxic residue.

HUSKEE ORIGINAL REUSABLE SOLUTIONS

HuskeeOriginal range is crafted from coffee husk, a byproduct of the coffee industry. This innovative repurposing approach gives new life to what would otherwise be waste, aligning sustainability with style. Not only does it contribute to reducing landfill waste, but it also supports the financial well-being of coffee farmers. With matching lids and saucers, every component offers a thoughtful, sustainable solution from crop to cup.

HUSKEE **RENEW** REUSABLE SOLUTIONS

HuskeeRenew is made from Tritan Renew 50 — a durable, shatterproof material made from 50% certified post-consumer recycled content.

Made to last, it's stain-resistant, dishwasher safe, and designed to retain its clarity wash after wash. Lightweight and stackable, it pairs perfectly with our compatible lids and saucers for seamless everyday use.

TAKEAWAY CONTAINERS

Clear Bowls & Lids

Made from plant-based bioplastic. Certified industrially compostable (AS4736).

Paper Takeaways

Made with sustainably sourced paper and lined with plant-based bioplastic or aqueous coating. Certified home (AS5810) or industrially (AS4736) compostable.

Sugarcane Takeaways, Plates, Trays & Bowls

Made from plant fibre, a by-product that remains after sugarcane harvesting (that would otherwise be burned).

We're transitioning our entire plant fibre range to a formulation with no added PFAS. During this changeover, some out-of-stock items may be temporarily substituted with earlier stock.

Sushi Boxes & Lids

Made from FSC™ premium paper, BioBoard Sushi Boxes are coated with aqueous coating, while BioCane trays are made with no added PFAS.

BioBoard Corrugated Boxes & Trays

Made with FSC™ certified paper board.

BioBoard Boxes & Wrap Wedges

Made with FSC™ certified paper.

BioBoard Catering Trays Bases & Lids

Made with unlined FSC™ certified paper.

*Printed kraft-look: We only use paper from sustainably managed plantations and there is a limited availability of certified kraft paper. In these cases, we opt to use certified white paper with a printed kraft-look to maintain range consistency.

In WA, the PLA windowed items are only allowed if used for pre-packed food on display, otherwise, they are banned.
