## FOUNDERS STORY

Our family came up with the name "FastAid" to reflect our goals of speed and ease of use, as well as the caring nature of our products.

We really wanted to make sure that we lived up to making first aid fast and easy, in every way.

Since the 1950's, and spanning 5 generations, our family has been involved in the safety industry, particularly in the child safety product space. Safety has always been important to us, and we've always believed in and cared about safety related products that can make a real difference to peoples lives and wellbeing.

In 2005, while traveling in the United Kingdom, I noticed that their workplace first aid system was much simpler and more efficient than in Australia. This inspired me to bring that same simplicity and efficiency back home.

When I returned to Australia, I found that each state or territory had different first aid rules. This meant that a national workplace had to deal with the headache of up to 48 different first aid kits just to comply, which was very confusing and often led to non-compliance, simply because it was all too hard. First aid kit auditing and replenishment was the same nightmare, which often led to expired and depleted supplies, and ultimately had negative safety impacts.

I sensed a fantastic opportunity to change the first aid industry. I wanted to simply make first aid fast and easy. I believed that simplifying first aid would greatly improve workplace safety and make a real difference.

So FastAid was established in 2006.

Our family came up with the name "FastAid" to reflect our goals of speed and ease of use, as well as the caring nature of our products. We really wanted to make sure that we lived up to making first aid fast and easy, in every way.

We focused on creating simple, innovative, and great looking products, with a simple 3-step method to help people choose the right first aid kit. Along with that we had a passion for providing an excellent customer experience.

Today, our Purpose is a great reflection of what we strive to do every day; Safer, happier lives through empowering people to provide care with confidence.

Our passion for providing a great customer experience, going the extra mile, and developing innovative products are at the heart of everything we do.

As a family and a team, we're excited for the future and the positive impact FastAid is having on the lives and wellbeing of Australians right across the country.

  
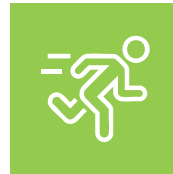

**Michael Horsfall**  
Founder

# OUR VALUES

## Defining who we are

Our values define who we are. We live and breathe them every day in everything we do.

## Go the extra mile

We show that we really care by doing more than just what is expected. We are onto it and find solutions. We are genuine and love to help others.

## Passion for progress

We are never satisfied with the status quo and are hungry for growth and improvement. We find ways to innovate and do it better.

## Keep it simple, make it easy

What's kept simple gets done. We always challenge ourselves to simplify, standardise and make it easier.

## Own it, team first

We take ownership and have a team first approach for the greater good of FastAid. We care for the team, we work as a team, we win as a team.

# OUR GUARANTEES

## Our word is our promise

At FastAid, our word is our promise. That's why we are prepared to back what we do with ironclad guarantees.

## 5-year expiry

FastAid products last longer. We guarantee a 5-year expiry from date of manufacture, meaning you get more mileage.

## 6-month free returns

If you aren't 100% happy, neither are we. Let us know within 6 months of purchase and we'll pick it up and give you a refund.

## Always in stock

Over 97.8% of our catalogue products are always in stock, meaning you can get what you want when you want it.

## Our 3-2-1 promise

Calls answered within 3 rings, enquiries responded to within 2 hours, quotes within 1 hour. We're onto it, and get things sorted fast, no fuss.

## Order by 1, shipped by 5

Order by 1pm and we'll ship catalogue products same day.

**Low risk** workplace means a workplace where workers are not exposed to hazards that could result in serious injury or illness such as offices, shops or libraries. Potential work-related injuries and illnesses requiring first aid would be minor in nature.

**High risk** workplace means a workplace where workers are exposed to hazards that could result in serious injury or illness and would require first aid. Examples of workplaces that may be considered high risk are: mobile plant, manufacturing plants, construction, mining, trades, warehousing and food manufacturing.

## Workplace first aid simplified.

Easy-Refill™ is our flagship first aid system and a game changer for workplace safety.

Designed to be refilled in under three minutes, it helps businesses stay compliant, organised and ready to respond.

With colour-coded contents, 24/7 online refilling, and a live compliance dashboard, Easy-Refill takes the hassle out of maintenance while cutting costs by avoiding overstocking.

**EASY-REFILL**  <sup>TM</sup>

# EASY-REFILL WORKPLACE™ FIRST AID KIT

- DIY online refills in less than 3 minutes
- Integrated first aid action guide and colour coded contents
- Quality white metal wall mount cabinet
- TGA registered no. 128314 quality guaranteed
- Compliant for 1-25 person workplaces

The FastAid Easy-Refill™ first aid kit is a revolutionary colour coded easy-access first aid kit perfect for any workplace looking to be WHS compliant and better first aid prepared, whilst reducing the cost of first aid.

Fast and easy to audit and replenish, the Easy-Refill™ first aid kit comes with an online app to DIY audit and order replenishments 24/7. Easy-Refill™ helps reduce costly call out service fees and saves you waiting for on-site service, helping you stay compliant, prepared and ready to respond.

Colour coded first aid contents make identifying the correct item to use in an emergency easy. Contents also incorporate an 'easy-open' box system to enable you to see what has been opened since your last audit and requires replenishment.

Integrated first aid treatment guide helps to ensure effective response to common workplace injuries and to assist responders in being able to easily select the correct contents for first aid treatment.

Housed in a durable wall mountable metal cabinet, the Easy-Refill™ kit is built with heavier gauge steel than standard, ensuring your first aid kit can withstand the rigours of the workplace.

Exceeds requirements of the national WHS Code of Practice for low-risk workplaces with up to 25 persons. The Easy-Refill™ kit also has room to accommodate FastAid's additional risk modules for high-risk workplaces.

# P MOTORIST™ FIRST AID KIT

- Blue fabric soft pack
- Tough water-resistant backed fabric
- TGA registered no. 128314
- Handy glove box style kit
- Ideal for non-work vehicle applications

The FastAid Motorist™ first aid kit is your handy medical tool ideal for non-work use vehicles where workplace WHS compliance is not required.

Compact case design makes this kit easy to fit into your vehicle's glovebox or for stowing underneath the seat.

Packed with a range of premium hospital grade contents like adhesive plasters, wound wipes, eye wash, CPR face shield, and much more, the Motorist™ kit contains all the essentials you require for basic injuries.

Unique colour coded contents make locating the right item in an emergency faster and easier.

Internal fold out compartments help keep your first aid kit organised and ready to go, ensuring you are ready for that unexpected roadside emergency.

Adjustable velcro belt loops straps also included for when you are on the go away from your vehicle.

# R2 CONSTRUCTA MAX™ FIRST AID KIT

- Available in five case options: metal cabinet, plastic portable, tackle box, soft pack, and refill pack
- TGA registered no. 128314
- Suitable for 1-25 person workplaces
- Durable, organised design with internal compartments
- Designed for construction sites and tradies

The FastAid R2 Constructa Max™ first aid kit is a high-quality kit designed for both low and high-risk applications, exceeding the WHS requirements for Australian workplaces in the construction and trades industries.

This first aid kit meets the WHS regulations for workplaces that have 1-25 people and contains items that are specially designed for treating injuries that can happen in the construction and building industries.

A comprehensive range of premium hospital grade contents and two additional modules for treating eye injuries and outdoor risks such as snake and spider bites are packed in the R2 Constructa Max™ first aid kit. A full colour snake and spider bite identification chart and treatment guide is also included.

FastAid's R2 Constructa Max™ first aid kits offer a choice of case designs to suit your needs:

**Metal Cabinet:** Heavy-gauge steel for durability, with an internal organisation sleeve for high-use items.

**Plastic Portable:** Compact and lightweight, perfect for mobile use.

**Tackle Box:** Sturdy design with a convenient carry handle for on-the-go use.

- Available in four case options: metal cabinet, tackle box, soft pack, and refill pack
- TGA registered no. 128314
- Suitable for 1-25 person workplaces
- Durable designs for tough environments, with clear, organised compartments
- Ideal for manufacturing and warehouses

The FastAid R2 Industria Max™ first aid kit is a premium-quality kit designed for both low and high-risk workplaces, exceeding the WHS requirements for Australian workplaces in the manufacturing and general workplace sectors.

This first aid kit complies with WHS regulations for workplaces with 1-25 persons and includes specific first aid items for treating injuries common in factory and general workplace environments.

Unique colour coded contents make locating the right item in an emergency faster and easier.

A comprehensive range of premium hospital grade contents are included in the FastAid R2 Industria Max™ kit, as well as two additional modules for treating burn and eye injuries. Includes extras such as hydrogel burn gels and dressings for effective burns treatment, including treatment guides.

FastAid's FastAid R2 Industria Max™ first aid kits offer a choice of case designs to suit your needs:

**Metal Cabinet:** Heavy-gauge steel for durability, with an internal organisation sleeve for high-use items.

**Tackle Box:** Sturdy design with a convenient carry handle for on-the-go use.

**Soft Pack:** Lightweight, water-resistant fabric with zippered compartments for easy access.

**Refill Pack:** Clip seal bag for quick restocking or standalone use.

# **R4** REMOTE AREA MEDIC™ **FIRST AID KIT**

- Red fabric soft pack
- Tough water-resistant backed fabric
- TGA registered no. 128314
- 1-50 person low and high risk compliant
- Covers larger remote worksites

The FastAid R4 Remote Area Medic™ first aid kit is the ultimate kit for larger remote worksites, exceeding Australia's national Work Health and Safety (WHS) standards for workplace environments.

This first aid kit is crafted for use in first aid rooms and exceeds the latest WHS regulations. It is compliant for low-risk work areas and high-risk remote locations, including mines and civil sites, accommodating up to 50 persons on-site.

The R4 Remote Area Medic™ first aid kit is comprehensively stocked with premium hospital-grade supplies with extras to comply to WHS remote requirements. It also contains

five supplementary modules designed for treating burns, eye injuries, and outdoor hazards like snake and spider bites. The outdoor module features a full-color guide for identifying and treating snake and spider bites, along with the necessary components for effective bite management. Additionally, the burns module is equipped with items such as hydrogel burn gels and dressings, complemented by guides for efficient burn care.

Unique colour coded contents make locating the right item in an emergency faster and easier.

This highly portable and exceptionally durable medical-style soft pack case features internal compartments for organised storage and includes an adjustable shoulder strap for quick grab-and-go scenarios. Concealed backpack straps can be deployed to convert the kit into a backpack-style case. For enhanced visibility in dim lighting, the case's exterior is equipped with a reflective strip, making it easier to locate your first aid kit.

## Adventure-ready, wherever life takes you.

For wherever life takes you, the Aspire-Edition is your trusted first aid companion. Crafted for solo adventurers, outdoor loving families and tradies, each kit blends rugged durability with essential first aid supplies.

With ultra-tough, water-resistant cases and thoughtfully organised contents, the Aspire-Edition ensures you're not just prepared for emergencies—you're ready to conquer them, no matter where your journey leads.

**ASPIRE-EDITION** <sup>TM</sup>

# Snake Bite™ FIRST AID KIT

- Khaki rugged soft pack
- Ultra-tough portable case with strapping
- TGA registered no. 128314
- Splash resistant fabric and zippers
- Essential treatments for snake bites

The Aspire-Edition™ Snake Bite Kit is a must-have for those hiking or working in areas where snakes are common. It includes essential treatment items and features our Evo-Bandage, a latex-free compression bandage with indicators for easy and accurate application. This bandage is crucial for promptly restricting venom flow after a snake bite.

The kit also includes a full-color Snake Identification Sheet and an easy-to-follow Symptoms and Treatment Guide. These resources help users correctly identify snake species and administer appropriate treatment based on symptoms.

Designed for durability and convenience, the kit comes in a rugged khaki soft case with MOLLE strapping. It can be easily attached to backpacks, mountain bikes, or ATVs, ensuring accessibility during emergencies. Reflective tape and piping improve visibility in low light, while water-resistant fabric and zippers protect contents from moisture and dust.

In summary, the Aspire-Edition™ Snake Bite Kit combines practical medical supplies with informative guides, making it essential for anyone at risk of encountering snakes in their outdoor activities.

# Snake & Spider™ FIRST AID KIT

- Khaki rugged soft pack
- Ultra-tough portable case with strapping
- TGA registered no. 128314
- Splash resistant fabric and zippers
- Ideal for all snake and spider prone areas

The Aspire-Edition™ Snake & Spider Bite Kit is essential for anyone hiking or working in snake or spider prone areas. You never know where, you never know when!

Packed with a range of treatment essentials, this kit also contains our unique Evo-Bandage™ premium latex free snake bite compression bandages with indicators. The Evo-Bandage™ ensures fast, easy, and correct application of compression to the bite victim which aims to restrict the flow of venom throughout the body.

Complete with a full colour Snake and Spider Identification Sheet and easy to follow Symptoms and Treatment Guide to ensure correct treatment depending on the source of the bite. Also includes items such as a foam-padded splint, shears, permanent marker, CPR mask and whistle for attracting attention.

The Aspire-Edition™ Snake & Spider Bite Kit is packed in a rugged, compact khaki soft case with MOLLE strapping for safely securing your kit to almost anything from backpacks to mountain bikes to ATV's. Reflective tape and piping also increases visibility in low light conditions. Water resistant fabric and zippers also assists with keeping your kit contents dry and dust-free.

This functional first aid kit is designed with the user in mind and has internal fold out compartments to assist with kit organisation.

# OUTDOOR RECREATION™ FIRST AID KIT

- Red rugged soft pack
- Ultra-tough portable case with strapping
- TGA registered no. 128314
- Splash resistant fabric and zippers
- Contains Evo-Bandage snake bite bandage

The Aspire-Edition™ Outdoor Recreation first aid kit is a 1-10 person vehicle compliant kit designed for outdoor recreation and includes a variety of essential first aid items. It features the Afterbite Itch Eraser for insect bites, a Fever Scan strip forehead thermometer for temperature monitoring, and an LED torch for visibility and emergencies. Key components also include the Evo-Bandage™, a premium latex-free snake bite compression bandage with compression indicators for proper venom restriction.

Basic wound care essentials such as plasters, dressings, and eye wash are included, along with hydrogel burn gel for treating burns.

Packaged in a rugged, compact khaki soft case with MOLLE strapping for secure attachment to vehicle headrests and cargo barriers or ATVs, the kit features reflective tape and piping for visibility in low-light conditions. Water-resistant fabric and zippers keep contents dry and dust-free.

Internally, the kit is organized with color-coded contents and fold-out compartments for easy access and organization during emergencies. Designed with the user in mind, it aims to provide comprehensive first aid support for outdoor enthusiasts.

- Includes essential eye injury treatments
- Ideal for manufacturing and construction workplaces

The FastAid Focus™ Emergency Eyewash Station is a high-visibility, wall-mounted emergency eye care station designed to provide rapid and effective treatment for eye injuries. Also includes a handy eye injuries treatment card.

Equipped with two 500ml bottles of sterile saline solution featuring ergonomic eye showers, two sterile eye pads, conforming bandage, first aid tape and a shatterproof internal mirror, this station ensures quick and precise response during critical moments.

The translucent cover enhances visibility, allowing users to quickly confirm the availability of contents, while the quick-detach wall mount ensures easy portability in emergencies.

Ideal for industrial workplaces, manufacturing and construction environments, the FastAid Focus™ Emergency Eyewash Station is engineered to protect contents in dusty areas.

Includes wall mount screws and wall plugs.

# FOCUS EMERGENCY™ BIOHAZARD STATION

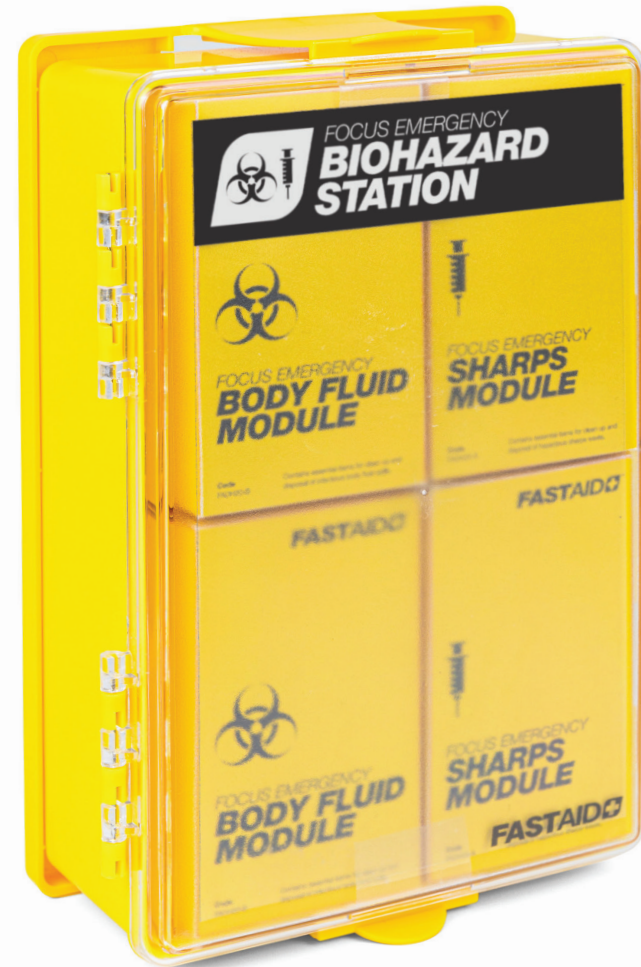

- Includes dedicated body fluid clean up modules
- Includes essential sharps collection modules
- Individual replaceable modules for easy use
- Dual-purpose wall mountable and portable plastic case
- TGA registered no. 128314

The Focus Emergency Biohazard Station is a purpose-built solution for managing high-risk incidents involving sharps and infectious body fluids. Designed for both wall-mounting and portability, the station remains clearly visible and ready to respond—whether fixed in place or grabbed in an emergency.

Inside, the kit contains two sharps modules and two biohazard modules, each individually sealed for single-use scenarios. This modular approach makes replenishment fast and cost-effective—simply replace the used module without restocking the entire station.

With clear quick-use instructions and TGA-registered contents, users can respond swiftly and safely in stressful situations. From blood spills to needle disposal, the kit supports infection control compliance and meets SafeWork Australia requirements, offering peace of mind for both staff and management.

## COMBAT TACTICAL APPLICATION TOURNIQUET

<b>Code</b>	FRI902
<b>Each</b>	1 tourniquet
<b>Inner</b>	-
<b>Carton</b>	-

Emergency tourniquet designed for rapid application to a limb in case of major hemorrhage.

## FIRST AID KIT TAMPER TAG

<b>Code</b>	FAT001
<b>Each</b>	100 tags per bag
<b>Inner</b>	-
<b>Carton</b>	50 bags

An easy way to ensure your first aid kits have not been opened or tampered with between audits. Serialised tags.

100-pack in a resealable clip-seal bag.

## INFRARED EAR & FOREHEAD THERMOMETER

<b>Code</b>	FRI166
<b>Each</b>	1 thermometer
<b>Inner</b>	-
<b>Carton</b>	40 thermometers

Ensures accurate and stable body temperature readings, without the need for physical contact from a distance of around 5cm.

## PREMIUM TICK REMOVAL KIT

<b>Code</b>	TR100
<b>Each</b>	1 kit
<b>Inner</b>	10 kits
<b>Carton</b>	100 kits

Kit includes a quality tick remover for safely removing larger embedded ticks, and specially shaped super-fine tweezers for removing nymphs and small ticks.

Packaged in a retail box.

## VOMIT BAG

<b>Code</b>	FRA050
<b>Each</b>	50 bags per box
<b>Inner</b>	-
<b>Carton</b>	10 boxes

Intended to collect and contain a patient's vomit until it is convenient to dispose of the bag and its contents.

50-pack in a cardboard box.

## 3.5G HYDROGEL BURN GEL

<b>Code</b>	H1
<b>Each</b>	5 sachets per pack
<b>Inner</b>	10 packs
<b>Carton</b>	100 packs

Burn gel to cool, soothe and relieve pain from minor burns. Contains 90% purified water, propylene glycol, glycerol, emulsifier and surfactant.

Easy-Refill™ compatible retail box.

## 10 X 10CM HYDROGEL BURN DRESSING

<b>Code</b>	H2-BULK
<b>Each</b>	5 dressings per bag
<b>Inner</b>	-
<b>Carton</b>	20 bags

Burn gel dressing to cool, soothe and relieve pain from minor burns. Contains 90% purified water, propylene glycol, emulsifier and surfactant.

10-pack in a resealable clip seal bag.

## 25G TUBE HYDROGEL BURN GEL

<b>Code</b>	FRH025
<b>Each</b>	1 tube
<b>Inner</b>	36 tubes
<b>Carton</b>	144 tubes

Burn gel to cool, soothe and relieve pain from minor burns. Contains 90% purified water, propylene glycol, glycerol, emulsifier and surfactant.

 **60 X 40CM HYDROGEL BURN DRESSING**

<b>Code</b>	<b>FRH105-S</b>
<b>Each</b>	<b>1 dressing</b>
<b>Inner</b>	<b>-</b>
<b>Carton</b>	<b>12 dressings</b>

Burn gel dressing to cool, soothe and relieve pain from minor burns. Contains 90% purified water, propylene glycol, emulsifier and surfactant.

 **30 X 40CM HYDROGEL BURN FACE MASK DRESSING**

<b>Code</b>	<b>FRH112</b>
<b>Each</b>	<b>1 dressing</b>
<b>Inner</b>	<b>-</b>
<b>Carton</b>	<b>12 dressings</b>

Burn face mask dressing to offer immediate and rapid cooling, helping to prevent further tissue damage, relieve pain and aid in the healing process.

 **75 X 75CM STANDARD BURNS SHEET**

<b>Code</b>	<b>FRH207</b>
<b>Each</b>	<b>1 burns sheet</b>
<b>Inner</b>	<b>-</b>
<b>Carton</b>	<b>96 burns sheet</b>

Burn sheet is designed to minimise trauma on removal, through coating one side with a low adherent coating.

 **PLASTIC ADHESIVE PLASTERS**

<b>Code</b>	<b>P1</b>
<b>Each</b>	<b>50 plasters per pack</b>
<b>Inner</b>	<b>10 packs</b>
<b>Carton</b>	<b>100 packs</b>

High-stick, breathable and flexible plastic plasters for minor wound care. Non-stick dressing pad provides cushion comfort for the wound and allows for gentle removal.

Easy-Refill™ compatible retail box.

 **FABRIC ADHESIVE PLASTERS**

<b>Code</b>	<b>P2</b>

**Each** 12 rolls per box  
**Inner** -  
**Carton** 20 boxes

Strong zinc oxide fabric tape to secure bandages and dressings. 12-pack in a cardboard box.

## FIRST AID EQUIPMENT

### Complete on-site care for workplaces.

A well-equipped first aid room is an essential part of any workplace safety plan—especially in larger or higher-risk environments. FastAid offers a comprehensive range of first aid room equipment to support effective injury management and recovery on-site.

According to national WHS guidelines, a dedicated first aid room is recommended for low-risk workplaces with 200 or more employees, and high-risk workplaces with 100 or more employees. Our range ensures you're equipped to meet these recommendations with confidence.

## FIRST AID ROOM FIT-OUT PACKAGE

**Code** FARPACK1

- Essential equipment for first aid room fit-outs
- Ensures compliance to WHS code of practice
- Minimal product assembly required
- Save time and hassle sourcing individual items
- Ideal for new site establishment

The FastAid First Aid Room Fit-out Package makes fitting out a first aid room during new site establishment or a refurbishment easy.

Designed to meet the requirements of the WHS 'First Aid in the Workplace' code of practice, this package includes everything you need to fit-out a fully functional and efficient first aid room.

The code of practice states; First aid rooms A first aid room should be established at the workplace if a risk assessment indicates it would be difficult to administer first aid unless a first aid room is provided. For example, workplaces where there is a higher risk of serious injury or illness occurring, requiring

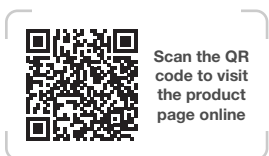

immediate first aid and possible further treatment by an emergency service, may benefit from having access to a dedicated first aid room. A first aid room is recommended for: – low risk workplaces with 200 workers or more, or – high risk workplaces with 100 workers or more.

Requiring minimal assembly, the first aid room fit-out package includes equipment such as an examination bed with access steps, portable privacy screen, storage cupboard, emergency pole stretcher and much more, as well as a host of consumables such as disposable sheets, pillowcases, hand towels and much more.

Conveniently supplied palletised, this package is a great solution to save time and hassle involved in individually sourcing required equipment and consumables.

The WHS 'First Aid in the Workplace' code of practice is available at [www.safeworkaustralia.gov.au](http://www.safeworkaustralia.gov.au) and should be referenced to ensure the design and other requirements are met.

## ECO OXYGEN THERAPY KIT

- Basic red boot style oxygen therapy kit
- Heavy duty 1200 denier fabric bag
- Fits 400L - 470L C size oxygen cylinder
- Removeable shoulder strap
- Internal pockets for contents organisation

The FastAid Eco Oxygen Therapy Kit is designed to neatly store the included essential items for providing oxygen therapy in a workplace setting such as a first aid room and accommodates an Australian 400L-470L C size oxygen cylinder (not included).

With incredibly durable 1200 denier coated TPE fabric, this bag is also water and stain resistant. The bag also features a removable waterproof skid sheet for base protection and removable top bag for general first aid equipment.

A large outer zipper pocket provides ample room for a regulator, resuscitator, tubing, masks and all other accessories. This bag is ergonomically designed for use as a shoulder bag with a removable should strap or carry bag style. Reflective strips also improve the visibility of your oxygen therapy kit.

The kit suits an Australian 400L-470L C size oxygen cylinder available from medical oxygen suppliers such as BOC or Supagas.

# ADVANTAGE OXYGEN THERAPY KIT

- Deluxe red oxygen therapy kit
- Convertible backpack with padded shoulder straps
- Heavy duty 1200 denier fabric
- Fits 400L - 470L C size or 1900L D size oxygen cylinder
- Internal pockets for contents organisation

FastAid Advantage Oxygen Therapy Kit is the ultimate convertible backpack style kit designed to neatly store everything you need for providing oxygen therapy in a workplace setting such as a first aid room. Accommodates an Australian 400L-470L C size or 1900L D size oxygen cylinder (not included).

Concealed backpack straps easily slide out for instant conversion to an ergonomic backpack bag for maximum portability in demanding environments. Padded shoulder straps provide additional comfort to the user.

With incredibly durable 1200 denier coated TPE fabric, this bag is also water and stain resistant. The bag also features a waterproof skid sheet for base protection and numerous internal compartment bags for contents organisation.

Large outer zippered pockets provide ample room for a regulator, resuscitator, tubing, masks and all other accessories. Reflective strips also improve the visibility of your oxygen therapy kit.

The kit suits an Australian 400L-470L C size or 1900L D size oxygen cylinder available from medical oxygen suppliers such as BOC or Supagas.

## HAWK™ BASKET STRETCHER WITH LIFTING BRIDLE

- Emergency horizontal lift basket stretcher
- Includes certified lifting sling and karabiners
- Includes integrated quick release patient restraints
- Durable polyethylene shell with aluminium frame
- Serialised compliance labels included

The FastAid Hawk™ Basket Stretcher is an emergency horizontal lift patient-handling device designed to transport patients to conventional cots or stretchers from areas that are difficult to access, with a working load limit of 272kg (for both the stretcher and included lifting bridle).

The durable outer polyethylene shell is chemical, UV, rust, and corrosion resistant giving you peace of mind that your stretcher will remain in good operating order in demanding environments.

Four stainless steel lifting bridle rings located for quick attachment of the included lifting bridle assembly for horizontal lifting and lowering of the patient.

Integrated runners and moulded handholds make moving the stretcher around easy, whether carrying or sliding across rough terrain including angle rescues.

An integrated mattress is also included inside the stretcher base for added patient comfort and is easily removable for cleaning purposes.

The FastAid Hawk™ Basket Stretcher is supplied standard with three quick release patient restraints and a foot plate that are permanently attached to the stretcher sides to prevent loss. Seat-belt style buckles are easy to fasten and release and also provide quick length adjustment.

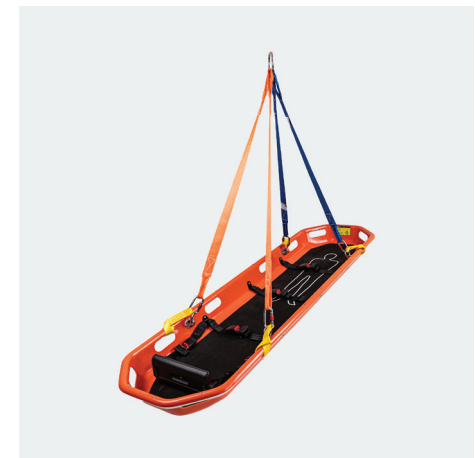

Includes full colour detailed user guide and serialised data labels permanently affixed to the stretcher and lifting bridle to assist with site equipment compliance.

The RBA300 FastAid DuroApex™ Backboard, RSS150 FastAid Bandit™ Scoop Stretcher and RSS155 FastAid NEM™ Scoop Stretcher are also compatible and fit inside the FastAid Hawk™ Basket Stretcher.

# BADGER™ POLE STRETCHER

- Dual fold for compact storage
- Easy to clean polyethylene coated nylon
- Lightweight and durable aluminum frame
- Includes carry bag and patient restraints
- TGA registered 304968

The FastAid Badger™ Pole Stretcher is a lightweight, durable emergency stretcher suitable for first aid response, industrial sites and events.

Both the stretcher cover, and the carry bag are constructed from polyethylene coated nylon, resistant to blood, body fluids and mildew and also easy to clean. Also features a lightweight yet strong aluminium chassis with durable and comfortable hand grips for ease of handling.

The FastAid Badger™ Pole Stretcher includes quick-lock patient restraints, folds and comes with a quality protective storage bag with long handles for emergency grab and run situations.

TGA registered 304968 for peace of mind knowing that we only use quality materials in the manufacture of our stretchers.

The unfolded stretcher dimensions are 215 (L) x 52 (W) x 13 (H) cm and has a safe working load (SWL) of 159kg.

Code	Dimensions (cm)	Weight	Load limit	Colour
RSF102	215 (L) x 52 (W) x 13 (H) - Open	5kg	159kg	Orange

# FIRST AID EQUIPMENT

## DUROAPEX™ BACKBOARD

- High-density moulded HDPE
- Includes patient restraints
- X-ray translucent design
- Buoyant for water rescue
- 159kg load limit

Rated to carry up patients up to 159kg, the FastAid DuroApex™ Backboard is buoyant making it suitable for water rescue. Patient straps with plastic quick-lock buckles assist with immobilising the patient.

21 comfortable hand grip positions including two at the head end and one at the foot end. Tapered foot end design makes this backboard ideal for confined space handling and also includes curved edges for easy logrolling.

Also compatible with the RSB131 FastAid Hawk™ Basket Stretcher.

FastAid's DuroApex™ Backboard is an extremely durable backboard designed to assist with immobilising a person with suspected spinal or limb injuries during transport or movement.

Code	Dimensions (cm)	Load limit
RBA300	184 (L) x 45 (W) x 6 (H)	159kg

## VERSALITE™ CARRY SHEET

- Ideal for use in high pedestrian traffic areas
- Easy clean PVC resistant to bodily fluids
- 10 carry handles for safe patient movement
- Includes portable carry bag
- 159kg load limit

This stretcher is also very useful for loading patients who are unable to move independently onto a stretcher, or to transfer a patient from the stretcher to another surface.

Made from tough PVC material with a 159kg load limit, the FastAid VersaLite™ Carry Sheet is easy-to-clean, fire retardant and resistant to bodily fluids, blood and mildew. Also includes 10 durable, flexible and comfortable handles to assist with safe patient movement.

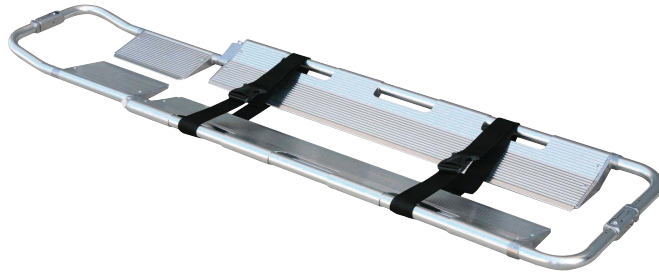

The FastAid VersaLite™ Carry Sheet is a versatile portable stretcher designed to transport patients for short distances in high pedestrian traffic areas and confined spaces.

Code	Dimensions (cm)	Load limit
RSC410	210 (L) x 75 (W)	159kg

**BANDIT™**  
SCOOP STRETCHER

- Robust all-aluminum construction
- Ideal for suspected spinal injury patients
- Compact folding design for storage
- Non-porous and easy to clean
- Includes patient restraints

This stretcher is easily adjustable length ways to accommodate varying patient sizes, with solid aluminium locks designed for the rigours of emergency situations.

This all-aluminium scoop stretcher uncouples at either end or both ends to assist with placement around a patient and folds length ways for storage and also includes quick-lock patient restraints.

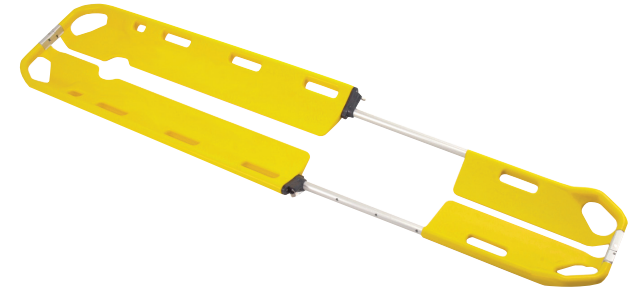

Also compatible with the RSB131 FastAid Hawk™ Basket Stretcher.

The FastAid Bandit™ Aluminium Scoop Stretcher is designed to eliminate the need for log-roll manoeuvres, which significantly decreases movement to the cervical spine. Also ideal for hip injuries and for moving accident victims.

Code	Dimensions (cm)	Load limit
RSS150	200 (L) x 42 (W) x 7 (H)	159kg

**NEM™**  
SCOOP STRETCHER

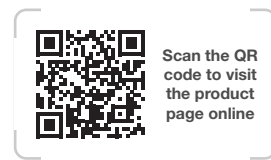

- Lightweight HDPE construction
- Ideal for suspected spinal injury patients
- Compact folding design for storage
- Non-porous and easy to clean
- Includes patient restraints

This stretcher is easily adjustable length ways to accommodate varying patient sizes, with solid locks designed for the rigours of emergency situations. The recessed head section assists with maintaining proper cervical alignment while the oval profile and angled handles provide ergonomic benefits

Also compatible with the RSB131 FastAid Hawk™ Basket Stretcher.

The FastAid NEM™ Scoop Stretcher is designed to eliminate the need for log-roll manoeuvres, which significantly decreases movement to the cervical spine. Also ideal for hip injuries and for moving accident victims.

Code	Dimensions (cm)	Load limit
RSS155	202 (L) x 44.5 (W) x 6.5 (H)	159kg

## EZYNEK™ CERVICAL COLLAR

FastAid's EzyNek™ Cervical Collar is a one-size fits all adult adjustable neck brace designed to assist with pre-extrication patient immobilisation.

Front and rear access is made easy via an oversized trachea hole to allow for pulse checks, while soft foam padded inner sides ensure patient comfort.

The EzyNek™ Cervical Collar is height adjustable with push locks and adjustment tracks to ensure symmetrical height alignment.

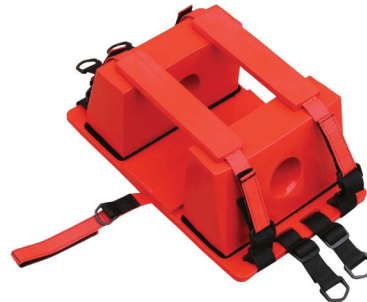

Code	Dimensions (cm)

## PROLOK™ HEAD IMMOBILISER

The FastAid ProLok™ Head Immobiliser is designed to provide patient comfort while providing immobilisation for potential neck and spinal injuries.

The unique head strap is designed to conform to patient's forehead for added comfort. Large ear holes are provided for monitoring the patient's ear canal. The head supports can be used on backboards or reversed for use on FastAid scoop stretchers.

The design of the FastAid ProLok™ Head Immobiliser ensures minimal interference with X-ray, MRI or CT scan procedures, and its waterproof plastic coating makes it easy to clean and impervious to body fluids.

## EMERGENCY 11 X 90CM SPLINT

FastAid's Trek Curva-Splint is a versatile and highly adaptable immobilisation tool, ideal for emergency responders, first aid kits, and outdoor medical situations. It is constructed from a lightweight aluminium alloy core, sandwiched between two layers of durable closed-cell foam.

The splint is radiolucent, meaning it can remain in place during X-rays without interfering with imaging—an essential feature for both clinical and field use. Its design allows it to be cut to size using standard first aid shears, making it suitable for custom applications on different body parts.

## PEALESS EMERGENCY WHISTLE

The FastAid Pealess Emergency Whistle is a high visibility orange plastic pealess whistle ideal for use in emergency situations or for adding to your first aid kit.

Includes a lanyard to ensure that the whistle stays easily accessible.

Pealess whistles have a clearer and louder sound, aiding to get attention in emergency situations.

Each pack includes 20 whistles.

## EMERGENCY 25W MEGAPHONE

If you need to make your voice heard during an emergency event, this device is ideal. It's fully portable, running on 8 C batteries (not included) for about 8 hours of use. The powerful 25W amplifier and horn speaker can project your message up to 500 meters away, ensuring that everyone in the vicinity can hear important announcements.

The shoulder strap makes it easy to carry, and the trigger activation ensures straightforward operation and power-saving when not in use. This makes it a reliable tool for emergency responders and coordinators to communicate effectively during critical moments.

## Do you need a first aid room?

A first aid room should be established at the workplace if a risk assessment indicates that it would be difficult to administer appropriate first aid unless a first aid room is provided.

A first aid room is recommended for:

- Low risk workplaces with 200+ workers
- High risk workplaces with 100+ workers

Source: First Aid in the Workplace Code of Practice, SafeWork Australia

## DEFIBRILLATORS

### Be ready when every second counts.

Sudden cardiac arrest can strike without warning—and every minute counts. In Australia, around 20,000 people suffer a sudden cardiac arrest each year, with survival rates dropping by up to 10% for every minute defibrillation is delayed. That's why there is a strong recommendation for all workplaces, regardless of size or risk level, to have a defibrillator on-site.

FastAid's range of easy-to-use defibrillators ensures your workplace is prepared to respond swiftly and confidently in a cardiac emergency. It's a small investment that could save a life.

# ***DEFIBRILLATORS***

# CHOOSING THE RIGHT DEFIBRILLATOR

	HeartSine Samaritan			LifePak CR2 Essential	
	RD500 Semi-Automatic Defibrillator	RD350 Semi-Automatic Defibrillator	RD360 Fully-Automatic Defibrillator	RDCR2-S Semi-Automatic Defibrillator	RDCR2-F Fully-Automatic Defibrillator
<p><b>Why is CPR so important?</b></p> <p>CPR stands for cardiopulmonary resuscitation. It is a lifesaving procedure that is given to someone who is unresponsive and not breathing normally.</p> <p>It helps to pump blood around the person's body when their heart can't. In addition, it helps prevent brain damage and limits cardiac and vital organ damage, whilst significantly increasing the chance of survival. It also buys time when professional help is on its way.</p>

Automatically turns on upon opening the lid, saving you time				✓	✓
	<b>Our recommendation!</b>	Great value, highly portable, compact		Great value, higher energy 360J shock, no need for separate paediatric pads (simply flick the switch)	

## Clinical feedback provided by a defibrillator during CPR is the solution

The RD500 takes clinical readings during CPR (as opposed to other AEDs that at best give feedback using superficial factors during CPR), and provides the rescuer with feedback based on cardiac output and other clinical factors. This is extremely important to give the rescuer confidence & reassurance.

### How many defibrillators do I need?

It is essential to consider the risks to your workforce and anyone else that visits your premises, to determine whether you should have a defibrillator (or multiple) on site. Factors to consider include;

- An ageing population - Age increases the likely hood of SCA occurring
- Urban locations - Increased difficulty for emergency responders to reach due to traffic, stairs, escalators etc
- High rise buildings - People living above floor 16 have a less than 1% chance of survival from SCA unless a defibrillator is present.
- Remote locations - Longer response times by emergency services.

### How should I store my defibrillator?

Your defibrillator should be visible and easily accessible to everyone that may enter your premises, and in a location that is not obstructed. There are a wide variety of storage options available, including;

- Wall brackets
- Internal wall cabinets
- Alarmed cabinets
- External wall cabinets
- Monitored cabinets
- Backpacks

# HEARTSINE SAMARITAN 500P

## SEMI-AUTOMATIC DEFIBRILLATOR

- 8-year warranty
- World leading CPR advisor
- Semi-automatic shock delivery
- Easy to follow visual and verbal guides
- Single battery and electrode in one replaceable cartridge

The FastAid HeartSine Samaritan 360P Defibrillator is a public access defibrillator with an 8-year warranty and a unique combined battery and pad-pak with a 4-year life from date of manufacture. After an event the complete pad-pak is replaced, which means you have a brand-new battery for the next event. This is more cost-effective than many other devices with expensive so-called long-life batteries when costed over the life of the device.

Ideal defibrillator for use in hotels, schools, restaurants, companies, clubs, shopping centres, sports clubs, aviation and shipping, doctor's offices, and hospitals.

The HeartSine Samaritan PAD 360P is suitable for use by trained lay users, semi-professionals and professional users alike. The device is a lifesaver for private, business, commercial and professional use.

The PAD 360P Defibrillator device can be used for SCA victims from the age of 8 and above utilising the Adult Pad Pak. For smaller children, the PAD 360P has a Special Paediatric Pad Pak available. HeartSine offers the only device to incorporate the electrodes and battery into one cassette for ease of use and the reduction of downtime following deployment.

The PAD 360P Defibrillator is maintenance-free as are all HeartSine Samaritan devices. The device is fully CE Marked and FDA approved for use around the world. Software updates are free of charge. The hardware is guaranteed for 8 years, and the unit is maintenance-free with only one replaceable part after use.

# DEFIBRILLATORS

## LIFEPAK CR2 ESSENTIAL SEMI-AUTOMATIC DEFIBRILLATOR

- 8 year warranty
- Semi-automatic
- Two set languages to choose from
- Toggle between adult and child modes
- IP55 rating for challenging environments

The FastAid Lifepak CR2 Essential is a semi-automatic AED that is designed to make the rescue process easier and ultimately save lives. With its audible instructions, clear graphics, and automated features, rescuers can remain focused on their task. The device also includes an inbuilt CPR Coaching system that gives users the confidence to perform CPR accurately, along with a metronome to ensure the correct compression rate is maintained.

The Lifepak CR2 Defibrillator is suitable for adults and children (with a Child Mode Button) and includes a Language Button for switching between primary and secondary languages. Its IP Rating 55 (dust and water protected) and lightweight design (2.0kg) make it portable and durable for use in any environment.

Metronome and CPR coaching sets an effective pace and audibly guides users with ClearVoice™ technology detecting background noise and adjusts volume accordingly for clear instruction. Continuous CPR improves blood circulation and increases chances of survival. The LIFEPAK CR2 is the only AED currently available that allows chest compressions during electrocardiogram (ECG) rhythm analysis, reducing pauses between CPR and defibrillation.

Highest available escalating energy provides up to 360J for more effective shocks as needed, with child mode delivering lower energy levels appropriate for young children without having to change electrodes. Also has a bilingual toggle to switch between two pre-set languages when using the device.

The Lifepak CR2 Defibrillator is designed for user confidence. Simple graphics, audible instructions and automated features help users remain focused during a sudden cardiac arrest emergency.

# LIFEPAK CR2 ESSENTIAL

## FULLY-AUTOMATIC DEFIBRILLATOR

- 8 year warranty
- Fully automatic
- Two pre-set languages to choose from
- Toggle between adult and child modes
- IP55 rating for challenging environments

The FastAid Lifepak CR2 Essential is a fully automatic AED that is designed to make the rescue process easier and ultimately save lives. With its audible instructions, clear graphics, and automated features, rescuers can remain focused on their task. The device also includes an inbuilt CPR Coaching system that gives users the confidence to perform CPR accurately, along with a metronome to ensure the correct compression rate is maintained.

The Lifepak CR2 Defibrillator is suitable for adults and children (with a Child Mode Button) and includes a Language Button for switching between primary and secondary languages. Its IP Rating 55 (dust and water protected) and lightweight design (2.0kg) make it portable and durable for use in any environment.

Metronome and CPR coaching sets an effective pace and audibly guides users with ClearVoice™ technology detecting background noise and adjusts volume accordingly for clear instruction. Continuous CPR improves blood circulation and increases chances of survival. The LIFEPAK CR2 is the only AED currently available that allows chest compressions during electrocardiogram (ECG) rhythm analysis, reducing pauses between CPR and defibrillation.

Highest available escalating energy provides up to 360J for more effective shocks as needed, with child mode delivering lower energy levels appropriate for young children without having to change electrodes. Also has a bilingual toggle to switch between two pre-set languages when using the device.

The Lifepak CR2 Defibrillator is designed for user confidence. Simple graphics, audible instructions and automated features help users remain focused during a sudden cardiac arrest emergency.

## WORKPLACE PLATINUM BEST-SELLERS DISPLAY STAND

Code DP-WORK-PLAT

- Ultimate range of best-selling first aid kits suited to the Workplace
- Maximise your first aid kit sales and store presentation
- 6-month sale or return guarantee
- Fast and easy to assemble
- Strong powdercoated metal construction

This sleek white FastAid Platinum Display Stand is designed to enhance any retail environment with its modern, clean appearance. Its sturdy steel construction ensures durability and versatility, making it ideal for various product displays.

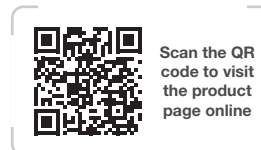

This package contains the ultimate range of best-selling first aid kits for larger workplace supplies stores, with each first aid kit complete with eye-catching retail packaging.

The stand features customisable shelving with adjustable positions, allowing you to accommodate products of different sizes. Its space-efficient design maximizes product visibility while minimizing floor space usage. It includes five shelves with clip strips and removable color R-series insert cards to assist customers with product selection. A prominent, integrated brand signage at the top boosts visibility and brand recognition.

The stand arrives flat-packed in four cartons with easy-to-follow, full-color assembly instructions and requires no tools for setup.

Dimensions: 2000 (H) x 900 (W) x 450 (D) mm

## CONSUMABLES DISPLAY STAND

Code DP-CONSUM

- Maximises visual appeal and presentation of your first aid consumables
- Spring-loaded pushers keep products front-facing and easy to access
- Saves time for staff with effortless replenishment and organisation
- Compatible with most 450mm deep retail shelving systems
- Easy clip-together assembly with adjustable dividers for flexible use

The FastAid First Aid Consumables Display Stand is the ultimate solution for clean, organised, and professional presentation of your first aid consumables range. Designed to improve both shelf efficiency and the customer experience, this smart display system keeps products tidy, visible, and easy to shop.

Built from durable ABS and PVC, the system features spring-loaded product pushers that automatically bring items forward, ensuring shelves always look full and well-presented. Adjustable dividers let you customise the layout for different SKUs, while the magnetic base keeps everything securely aligned on standard 450mm retail shelves.

## STOCKIST SUPPORT

### Retail ready packaging.

FastAid is committed to creating a seriously powerful brand presence in your retail store, and our new market-leading retail packaging is designed to do just that. Now applied across our complete first aid kit range, this packaging turns first aid into a true "self-sell" product. With clear product specifications, contents lists, barcodes, features and benefits front and centre, your customers can make confident, informed purchases at a glance, driving stronger retail outcomes and increasing sales for your store.

But it's not just about presentation. Our new cardboard packaging is made from 100% recyclable materials, reducing landfill waste and supporting more sustainable manufacturing practices. Compared to plastic, it uses 40% less energy and 50% less water during production. Plus, cardboard suffers less transit damage, meaning fewer product losses and less waste. With packaging that looks better on shelves, performs better in transit, and is better for the planet, FastAid is leading the way in responsible and retail-ready first aid solutions.
