ABOUT NCC APPAREL

ESTABLISHED IN 1997, NCC APPAREL IS AN AUSTRALIAN-OWNED FAMILY BUSINESS DEDICATED TO PROVIDING APPAREL TO AUSTRALIAN AND NEW ZEALAND SERVICE INDUSTRIES. WHILE OUR HERITAGE MAY STRETCH ACROSS SEVERAL GENERATIONS, OUR GARMENTS COMBINE MODERN TECHNOLOGY WITH HIGHLY ENGINEERED WORKWEAR THAT OFFERS LASTING COMFORT AND PROTECTION TO THE WEARER.

We have spent many years developing our designs to ensure every pattern is cut and stitched to last and live up to the demands of the most rigorous jobs. We take pride in offering innovative clothing solutions to a vast array of industries such as HOSPITALITY, MEDICAL, AGED CARE, CONSTRUCTION, INFRASTRUCTURE, OIL, GAS AND MINING INDUSTRIES. We also offer a wide range of FIRE-RETARDANT CLOTHING including WILDLAND FIREFIGHTING ENSEMBLES offering the latest technology in fabrics and trims.

nccapparel.com.au

OUR DESIGN CAPABILITIES

We have our own team of passionate inhouse Designers and Product Developers with collective experience of over 100 years in garment manufacturing and designing. NCC is an ISO 9001 Certified company with Technical Staff who are fully versed with Australian and New Zealand Standards. We use well-respected and recognized external Testing Laboratories to test all our fabrics and trims to ensure they meet the AS/NZS Quality Standards. Our experienced Technicians are happy to assist you in selecting the most suitable product specific to your industry.

MISSION STATEMENT

At NCC Apparel we strive to deliver high quality and functional workwear garments to our customers at the most competitive price in the right style, colour, size and fit complemented with exceptional service.

“WE BELIEVE IN DELIVERING FOR OUR CUSTOMERS “

CUSTOM MADE GARMENTS

Our team can be involved in all aspects of the design and development from customer design brief to final customer sign-off thus making for the best quality outcome for our customers.

We are always happy to provide advice to our customers on fabrics and design of their garments to suit any specific purpose be it for Hospitality, Medical, Industrial or Fire-Retardant Clothing.

EMPLOYEES ARE OUR MOST IMPORTANT ASSET

We regard employees as our Brand Ambassadors. It is through the hard work of our staff and management that allows us to bring to our customers innovative products and services at "value for money". At NCC we believe in investing in our people so we can provide the best possible service to our customers. Trained, Loyal and Passionate Workforce is an intangible asset that is not visible in the Balance Sheet of any business. Most businesses fail to recognise this, but we don't.

ETHICAL VALUES

NCC Apparel has strict Ethical Policies that we enforce upon all our suppliers and service-providers. We are committed to acting ethically and responsibly in all areas of our operation, consequently NCC Apparel has developed a Supplier Code of Conduct which forms the basis of all decisions and actions taken with regards to our supply chain:

- › Wages and benefits must be paid according to regulation
- › No Harassment or bullying within the workplace
- › No Child Labor
- › No Forced, Involuntary or Prison Labor
- › Zero tolerance to any form of discrimination in the workplace
- › Safe and hygienic working conditions must be provided to all workers

NCC recognises the importance in our society of increasing the economic growth of Aboriginal businesses. We are committed to ensuring that Aboriginal businesses are part of our supply chain and will always be happy to provide opportunities for them to participate in our procurement activities.

SUSTAINABILITY

NCC Apparel takes sustainability very seriously. We believe in meeting our own needs without compromising the ability of future generations to meet their own needs. NCC is committed to protecting our environment and provide quality to our lives and future generations.

Using recycled paper and plastic.

Using renewable, sustainable, and recycled materials in the manufacture of our garments.

Garment recycling programs with a focus on the reduction of landfill.

Using specialised services for recycling E-Waste.

We select our suppliers and service providers who share the same view on Sustainability.

FABRIC & MATERIAL SPECIFICATIONS

VISIBILITY

**HI VIS GARMENT
DAY ONLY**
AS/NZS 4602.1:2011

Class D garments are suitable for day use only and consist of High Visibility fabric. These garments provide no High Visibility protection at night. Background fabric complies with AS/NZS 1906.4:2010 High-Visibility materials for safety garments.

**HI VIS GARMENT
DAY AND NIGHT**
AS/NZS 4602.1:2011

Class D/N garments are suitable for either day or night use and consist of both High Visibility fabric and reflective tape. Both components comply with AS/NZS 1906.4:2010 High-Visibility materials for safety garments.

**HI VIS GARMENT
NIGHT ONLY**
AS/NZS 4602.1:2011

Class N garments are suitable for night use only. Reflective tape complies with AS/NZS 1906.4:2010 High-Visibility materials for safety garments.

**REFLECTIVE
TAPE 25 WASH**

Reflective tape fully complies with AS/NZS 1906.4:2010 High-Visibility materials for safety garments. Domestic wash 25 cycles @ 60°C.

**REFLECTIVE
TAPE 50 WASH**

Reflective tape fully complies with AS/NZS 1906.4:2010 High-Visibility materials for safety garments. Domestic wash 50 cycles @ 60°C.

**REFLECTIVE
TAPE 100 WASH**

Reflective tape fully complies with AS/NZS 1906.4:2010 High-Visibility materials for safety garments. Domestic wash 100 cycles @ 60°C.

**INDUSTRIAL
LAUNDRY TAPE**

Industrial tape withstands the rigours of industrial laundering, complies with AS/NZS 1906.4:2010 High-Visibility materials for safety garments. 50 cycles @ 92°C.

BIOMOTION

Biomotion, is the perceptual phenomenon in which highlighting the major joints of the body significantly increases recognition of the human form. By taking advantage of biomotion, clothing garments can increase visibility.

RAIL COMPLIANT

Garments specifically designed to provide protection for rail networks. They fully conform to national standards. Refer to the individual style features to determine which rail network is most appropriate.

PROTECTION

**SUN PROTECTION
UPF RATING 50+**
AS/NZ 4399:2017

Our garments provide UPF 50+ UV protection compliant with AS/NZ 4399:2017.

**PROTECTIVE CLOTHING FOR
WILDLANDS FIREFIGHTERS**
AS/NZS 4824:2006

Garments specifically designed and certified to provide protection against wildland fires.

PERFORMANCE

SUITABLE FOR INDUSTRIAL LAUNDRY

Our garments withstand the rigours of industrial laundering, lengthening the life cycle of a garment.

FOOD INDUSTRY

Clothing designed for the food and hospitality industries.

VENTED

Strategically placed mesh vents provide outstanding airflow and adds extra comfort on a hot day.

WARM

Garments that are designed to keep you warm.

SEAM TAPE

Garments are fully seam-sealed. Most waterproof fabrics will leak through the stitching if not seam sealed. Seam tape is a critical link for ultimate waterproof protection.

EASY CARE

Fabrics are easy care, machine washable and dry quickly.

MEDICAL

High quality hospital garments.

FABRIC

WICKING

Wicking fabric yarns have inbuilt technology that wicks moisture away from skin to the outside, keeping you dry.

STAY COOL

Wicking fabrics consist of a mesh knit construction that will keep the wearer cool and comfortable on warm days or when they're active.

COTTON BACK KNIT

Cotton back fabrics consist of polyester outer and cotton back inner knit construction for comfort and natural cotton feel against your skin.

WATER RESISTANT

These fabrics have a water resistant woven outer layer and PU coated inner layer that is engineered especially to be water resistant.

WINDPROOF

Fabrics are 100% Windproof. PU Coating acts against wind penetration, removing the chill factor.

BREATHABLE

Breathable fabrics have inbuilt technology that allow body heat and perspiration to move through the fabric to the outside, keeping you dry and comfortable.

COTTON

Cotton fabrics are highly absorbent, easy to handle and durable.

SNAG RESISTANT

Fabric specifically designed to potentially minimise the affects of incidental snagging during the laundering process.

STRETCH

The fabric is designed to stretch with your every move without compromising on the functional design of the garment.

ANTI-STATIC

Antistatic fabrics are designed to prevent Electrostatic Discharge effect when working with electronics, high-explosive vapours or super-clean lab works. Uncontrolled release from static build-up is a potential hazard in many industries. Antistatic fabrics have been specifically developed to provide the very best static control against incendiary spark, electronic equipment damage and facilitates the elimination of electrostatic charges from the surface of the fabric.

FABRIC & MATERIAL SPECIFICATIONS

FR

ATPV RATING
STANDARD IEC 61482-1-1:2019

Garments depicting this icon are a Hazard Risk Categories 2 or Personal Protection Equipment Class 2 (PPE2) and have an Arc Thermal Protection Value equal too or greater than 8cal/cm².

FR REFLECTIVE TAPE

FR-Silver Reflective tape offers excellent flame retardant protection.

LIMITED FLAME SPREAD
ISO 15025:2016 METHOD A
STANDARD ISO 11612:2015 A1

In the event of an incidental exposure to flame, the fabric will not ignite, create a hole or melt.

SMALL MOLTEN METAL SPLASH
ISO 11611:2015
STANDARD ISO 9150:1988

Able to withstand a minimum of 25 drops of small molten metal splash on the fabric.

RESISTANCE OF MATERIALS TO PENETRATION BY LIQUID
EN 14325 REPELLENCY & PENETRATION INDEX: 3
STANDARD EN 13034:2005+A1:2009

The fabric has a Class 3 repellency that is greater than 95%. Including Class 3 penetration that is less than 5% for at least four different types of liquid chemicals. Liquid chemicals: H₂SO₄ NaOH C₈H₁₀ C₄H₁₀O.

CHARGE DECAY
EN 1149-5:2018
STANDARD ISO 1149-3:2004 (METHOD 2, INDUCTION CHARGING)

The time needed to dissipate a certain percentage of charge induced on the surface of material is less than 4 seconds.

Flame Busters
HRC 2

WATER PENETRATION RESISTANCE

These fabrics have a water resistant woven outer layer and PU coated inner layer that is engineered especially to be water resistant.

AS/NZS1906.4:2010 HI VISIBILITY MATERIALS

This garment is suitable to be worn around high risk environments where the person needs to be seen at all times during times by personal using moving machinery and vehicles.

NENS 09

This is a guideline, not a standard. It is an industry-based document that has been set up by the Energy Network Association (ENA) and addresses a minimum performance level of clothing against electric arc hazards that may be encountered during the operation, construction and maintenance of electrical apparatus within the National Electrical Network Supply (NENS).

NFPA 2112

NFPA 2112 is intended to be referenced by those responsible of purchasing industrial FR work clothing. The standard provides a minimum requirement for personal protection when used in areas at any risk of short-duration thermal exposure from flash fire.

NFPA 70E®, STANDARD FOR ELECTRICAL SAFETY IN THE WORKPLACE®.

The focus of NFPA 70E is more about protecting the employee who is put at risk of an injury from electrical hazards. It is a standard to help employees and employers address the right levels of safety within the workplace.

WORKCRAFT

CRAFT

PROTECTIVE WORKWEAR NOT ONLY NEEDS TO BE EFFECTIVE AND EFFICIENT BUT NOW ALSO NEEDS TO BE FASHIONABLE. WHAT WAS ONCE VIEWED AS A COST BURDEN IS NOW SEEN AS A WORTHWHILE INVESTMENT IN EMPLOYEE SAFETY, STAFF MORALE, AND A REDUCTION IN CORPORATE HEALTH INSURANCE PREMIUMS.

**WORK
CRAFT**

Workcraft is an Australian brand and is well known for its fit-for-purpose, quality, comfort, performance, functionality, and durability in many different industries.

Your workwear signals a wide range of values and preference. It is therefore an important part of your company's profile and identity. A clear and consistent theme can create positive synergies when uniform, company vehicles, advertising and other marketing materials clearly indicate the company's profile.

Our objective is to help make the performance of hard-working professionals safer and more practical. Our garments meet or exceed all regulative standard requirements and we are constantly

testing and looking for innovative ways to grow our range across all industries: Food industry, Manufacturing, Infrastructure, Construction, Oil Gas and Mining industry.

The key to our success has been our unrelenting commitment to manufacturing fit-for-purpose workwear by partnering with only the best manufacturers to deliver the best quality products, ensuring highest levels of quality control throughout the manufacturing process.

Our helpful sales team is only a phone call away from you.

FLAMEE

COMPLIANCE STARTS AT THE CORE OF EVERY ARC-RATED AND FLAME-RESISTANT GARMENT. IN OUR FLAMEBUSTER STOCK-SUPPORTED GARMENT RANGE WE USE THE HIGHEST QUALITY ADVANCED MATERIALS, EXPERTLY DESIGNED FOR A DYNAMIC MODERN WORKFORCE, AND ASSEMBLED USING ADVANCED TECHNOLOGIES TO DELIVER INNOVATIVE, FIT -FOR - PURPOSE, WEAR-FRIENDLY GARMENTS.

Operating in environments where the smallest details are crucial, we understand the importance of having the right tools for the job. That is why we place the highest level of care and attention to our Flamebuster garments. NCC's Flamebuster range of Fire-Retardant clothing is especially designed for electrical, chemical, oil, gas, and mining industries. These industries have potential risk hazards such as incidental exposure to arc or flash fire. The potential risk of burns and other injuries in these industries are relatively high, and Flamebuster's fire-retardant clothing can protect your workers reduce the damage.

The fabrics used in our fire-retardant garments are resistant to flames and embers and are engineered

to be self-extinguishing. This means the fabric will not combust or burn if an incidental ignition occurs. This *feature will help to minimize the degree of burn injuries to the wearer. The flame-retardancy of the materials such as fabric, reflective tape and trims used in our Flamebuster range will last for the life of the garment, regardless of the laundering. Accordingly, our Flamebuster garments only utilize fully tested and accredited fabrics, raw materials and manufacturing process which can be produced upon request.

Our Wildland Fire Fighting ensembles use the latest technology in treated fabrics and are extensively used in Wildland Fire Fighting. These off the shelf ensembles come in two colours: Wildland GOLD and Wildland LIME.

Protecting your greatest asset your employees.

flamebuster.com.au

* It is important that FR garments are always maintained in a clean state. Avoid any combustible matter to be imbedded in the garment, such as grease, oil and petroleum-based liquids.

FLAMEGUARD® FR FABRICS

FLAMEGUARD® SERIES OF FABRICS USED IN FLAMEBUSTER® GARMENT ARE OFFERED IN FR TREATED AND INHERENT STYLES. THEY ARE BREATHABLE FABRICS WITH A HIGHER UPF PROTECTION CATEGORY. ALL FLAMEGUARD® FABRICS ARE TESTED IN ACCORDANCE TO AUSTRALIAN AND INTERNATIONAL STANDARDS FOR PROTECTION AGAINST FIRE RELATED RISKS.

FLAMEGUARD® INHERENT FABRICS

- › Inherent FR fabrics are specifically engineered through means of Nano technology and fibres that are naturally FR.
- › They are light weight fabrics with strong characteristics.
- › Inherent FR fabrics help to protect the wearer from body burn around potentially high-risk environments fire hazards in the workplace.
- › It is applicable to end users most likely to be exposed to fire hazards in the industrial, electrical, emergency and firefighting industries.
- › Inherent FR fabrics are not harmful to the human skin.

FLAMEBUSTER® ARC FLASH PROTECTION

FLAMEBUSTER® GARMENTS ARE SPECIFICALLY DESIGNED FOR THE DEMANDS OF EVERYDAY WORKWEAR. THEY ARE HIGHLY VISIBLE FLAME RESISTANT (FR) GARMENTS THAT ARE TOUGH WEARING, WHILST NOT COMPROMISING ON SAFETY OR COMFORT.

International, Australian and New Zealand standards including guidelines, are an integral part of providing protection to the work force. Flamebuster® garments have been designed to meet and exceed those requirements without compromising on value, comfort and quality.

The garments deliver personal protection to workers against the devastating effects of flash fire or arc flash events. Including, incidental exposure to naked flames. The high visibility features ensure that workers are always clearly visible, whilst being suitable for anybody who needs access to the correct level of protection. This especially applies for workers who are potentially working with live electricity or gas.

Flamebuster® garments used for the protection against arc flash are made from an assortment of Flameguard® inherent FR fabrics with the option of treated FR fabric should the request arise.

LEVELS OF FR PROTECTION

NFPA 70E[®], Standard for Electrical Safety in the Workplace[®].

The focus of NFPA 70E is more about protecting the employee who is put at risk of an injury from electrical hazards. It is a standard to help employees and employers address the right levels of safety within the workplace.

Employers must therefore be knowledgeable of the requirements. We are providing a guide of what those levels of protection are and recommend employers to read and understand the actual requirements of NFPA 70E[®], to ensure the appropriate level of safety is adopted.

Arc rated clothing that is designed for the protection against electrical hazards must have a High Risk Category (HRC) between 1 and 4. The higher the HRC the greater the protection.

High risk categories are determined through Arc Thermal Protection Values (ATPV), and those values define an Arc Rating. An arc rating is expressed in Calories/cm² (Cal/cm²).

The higher the Cal/cm² number, the greater the protection.

- > HRC1 = ATPV minimum 4 Cal/cm²
- > HRC2 = ATPV minimum 8 Cal/cm²
- > HRC3 = ATPV minimum 25 Cal/cm²
- > HRC4 = ATPV minimum 40 Cal/cm²

ENA NENS 09-2014 National Guideline for the Selection Use and Maintenance of Personal Protective Equipment for Electrical Arc Hazards.

This is a guideline, not a standard. It is an industry-based document that has been set up by the Energy Network Association (ENA) and addresses a minimum level of clothing against electric arc hazards that may be encountered during the operation, construction and maintenance of electrical apparatus within the National Electrical

Network Supply (NENS). ENA NENS 09-2014 is a guideline through a hierarchy of controls to assist employees and employers in making a knowledgeable decision of which clothing to select that provides the minimum level of protection against an arc flash event. It only applies to workers within the electricity supply industry who are required to work on or near low and high voltage electrical apparatus in Australia.

According to the guidelines garments which are considered as outer wear but may be worn in direct contact with the skin are base garments. A base garment is a coverall, a long-sleeved shirt and a trouser. The recommended minimum ATPV for base garments is 4 Cal/cm². HRC1 Employers will need to be knowledgeable of the requirements and study the actual requirements of NFPA 70E[®], to ensure the appropriate level of safety is adopted for their employees.

NFPA 2112 Standard on Flame-Resistant Clothing for Protection of Industrial Personnel Against Short-Duration Thermal Exposures from Fire.

NFPA 2112 is intended to be referenced by those responsible of purchasing industrial FR work clothing. The standard provides a minimum requirement for personal protection when used in areas at

any risk of short-duration thermal exposure from flash fire. Therefore, employers must be knowledgeable of those requirements. We recommend employers to read NFPA 2112 standard, to ensure the appropriate garments are chosen.

It provides information about design, construction, evaluation, and certification of materials used in the manufacturing of FR garments. It is not intended to provide personal protection against wildland firefighting, technical rescue, structural firefighting, proximity firefighting, or any other firefighting operations or hazardous materials emergencies.

DI8

OUR MEDI 8 STOCK-SERVICED RANGE OF RE-USABLE ENVIRONMENTALLY FRIENDLY GARMENTS FOR PATIENTS, DOCTORS AND NURSES HAVE BEEN CAREFULLY DESIGNED IN FABRICS THAT ARE MOST SUITABLE FOR MEDICAL WEAR WHILE ASSISTING IN A MORE SUSTAINABLE FUTURE.

Today's Healthcare worker is exposed to a growing number of increasingly dangerous pathogens on a daily basis.

Reusable surgical gowns are experiencing phenomenal growth worldwide, reducing Land Fill and not compromising in reliability and wearer comfort. Apart from absolute reliability and comfort characteristics, the improved bioclimatic and physiological properties are also of increasing demands such as durability, breathability and thermoregulatory characteristics. Keeping this in mind, we have designed and developed our range of re-usable medical garments which provide a feeling of confidence and great appearance to both medical workers and patients alike.

Our two-piece Medical Scrubs are the uniform of choice for doctors, nurses and others who work in hospitals, medical centers, and nursing homes around the country.

Apart from medical garments our Medi 8 range also offers ancillary products such as cellular blankets, adult feeders, draw sheets, huck towels, napkins, baby wraps, etc.

All our medical garments are industrially washable.

BARRIER SURGICAL GOWN		
STOCK SIZE	S	M
TO FIT WAIST	87-107	112-152

HOW TO MEASURE YOURSELF

MALE/UNISEX

A - NECK

Measure around your neck at collar level. Keep one finger between the measuring tape and neck.

B - CHEST

Standing naturally, measure around the fullest part of the chest, keeping the tape at under arm level. Keep one finger between tape and body.

C - WAIST

Measure around waist keeping one finger between tape and body. Measure at the navel.

D - INLEG

Measure the inside leg from the crotch to top of the heel of the shoe.

MEASURING TIPS

- > The above measurements are relating to body measurements in centimeters. These are not garment measurements.
- > For best results, ask someone to measure you with a tape measure. Keep the tape tight but not stretched and follow the above instructions.

KIDS

I - CHEST

Standing naturally, measure around the fullest part of the chest, keeping tape under arms and around shoulder blades.

J - WAIST

Measure around the smallest part of the child's waist, keeping one finger between tape and body.

K - HEIGHT

Standing with feet together and back to a wall. Measure from heel to the top of the head.

FEMALE

E - BUST

Standing naturally, measure around the fullest part of the chest / bust, keeping the tape at under arm level.

F - WAIST

Measure around the waist, placing one finger between tape and body. Measure above the navel, at the narrowest part of your waist.

G - LOW WAIST

Measure around the waist, placing one finger between tape and body. Measure 4cms below your navel.

H - HIPS

Standing naturally, measure around the fullest part of the hips. Keeping the tape level and straight. Placing one finger between tape and body.
